

Lesson 6.1T ~ Area with Fractions

Name _____ Period _____ Date _____

Use the given measurements to find the area of each rectangle. Label your measurement.

RECTANGLE: Area = length \times width

1. Area: \times = square _____

2. Area: \times = square _____

Use the given measurements to find the area of each square. Label your measurement.

SQUARE : Area = side \times side

3. Area: \times = _____

Don't forget to label the measurement as "square _____".

4. Area: \times = _____

Find the area of each triangle. Label your measurement.

TRIANGLE: $\text{Area} = \frac{1}{2} \times \text{base} \times \text{height}$

5. $\text{Area} = \frac{1}{2} \times \square \times \square = \underline{\hspace{2cm}}$

6. $\text{Area} = \frac{1}{2} \times \square \times \square = \underline{\hspace{2cm}}$

Measure the sides of the shape to the nearest quarter of an inch using a customary ruler.

7. a. Label the sides of the square with your measurements.
Write in simplest form.

b. Find the area of the square. Area =

8. a. Label the sides of the rectangle with your measurements.
Write in simplest form.

b. Find the area of the rectangle. Area =
