

# MATH TEST CORRECTION SHEET INSTRUCTIONS

Use the math test correction sheet to earn back partial credit on questions that you get incorrect. This is **required** to be completed for every test in which you receive a grade lower than 80%. You must turn this in within one week of receiving your corrected test.

For the "reason I did not receive full credit" section, you should fill in what your error was. Some examples are:

- read the question incorrectly
- math fact error
- rushed
- did not understand the topic
- did not completely answer the question
- used the wrong operation
- did not show my work

When you solve the problem, be sure to show ALL work. You will **not** earn any additional credit if all work is not shown!

The "what I learned from my mistake" section is just what it sounds like- tell me what you learned! Some examples are:

- label my answer
- slow down
- read carefully
- highlight important terms
- show all work
- study more
